Jeff Kaiser - Commonwealth of Kentucky Fleet Management
Tracey Thurman - Lexington Fayette Urban County Government

TARC Electric Buses in Downtown Louisville

TARC's new electric buses are traveling downtown streets, but they won't be carrying passengers until Monday, January 12.

TARC drivers are currently testing the ZeroBus along its regular downtown routes. Meanwhile, engineers are finishing installation and testing two charging stations.

"We don't want to get these buses out here on the route and then all of a sudden there is something wrong with the charging station and then it gets stuck out here," said TARC spokesperson Jon Reiter. "We want to make sure there are no I's to be dotted and T's to be crossed when these things get out here."

The goal of the all-electric buses is to replace the green trolleys. The trolleys will only be used during the Frankfort Avenue Trolley Hop, and eventually will be phased out all together.

About Us

The Kentucky Clean Fuels Coalition was established in 1993 to provide the first alternative fuels resource for Kentucky educators, consumers and providers of alternative fuels/vehicles. It is now a successful non-profit 501C3 self-supporting organization and a national leader in the clean fuels market.
