KENTUCKY CLEAN

FUELS COALITION

Idle Free Kentucky FLEET PROGRAM

Inspired by the extraordinary environmental impact that Kentucky fleets have made through idle reduction policies and technologies, the Kentucky Clean Fuels Coalition created the Idle Free Kentucky Fleet Program.

HELPING YOU ACHIEVE YOUR IDLE REDUCTION GOALS

The **Idle Free Kentucky Fleet Program** is a voluntary education and recognition program designed to acknowledge the accomplishments of Kentucky fleets while providing education and resources for other fleets interested in idle reduction.

The program is structured to provide flexibility for diverse fleets across the Commonwealth to pursue best practices in idle reduction while achieving recognition for successes along the way.

▶ **Reducing idling decreases fuel use, vehicle emissions, fleet costs, and engine wear.**

Eligibility:

Any centralized fleet operating in Kentucky with at least ten vehicles is eligible for participation in the Idle Free Kentucky Fleet Program. All vehicles are eligible for participation including passenger cars, light duty, medium duty, and heavy duty trucks, freight, forklifts, tractors, watercraft, street sweepers, and other off road vehicles.

Annual Awards:

Participating fleets in the Idle Free Kentucky Fleet Program are eligible for awards through the Green Fleets of the Bluegrass Annual Award Program.

Benefits:

All participating fleets receive recognition on the Kentucky Clean Fuels Coalition website, an annual rating through the Green Fleets of the Bluegrass Program and are eligible to earn a Green Fleets award. There is no fee for participating in Idle Free Kentucky.
