

IDLING'S IMPACT ON KENTUCKY!

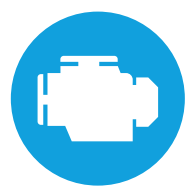

Idling is a serious global issue. Here are some eye-opening statistics everyone needs to know.

 **12 MILLION GALLONS**

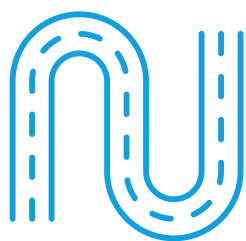

of fuel is wasted by idling in the United States every day

Idling for more than 10 seconds uses more fuel and produces more CO₂ than does stopping and restarting your engine

Turning your car off is better for the engine than leaving it running

2 MINS SPENT IDLING IS EQUAL TO 1 MILE OF DRIVING

Argonne estimates that, in the U.S., rest-period truck idling consumes up to 1 billion gallons of fuel annually at a cost of around \$3 billion

WHERE IDLING OCCURS

DRIVEWAYS

DRIVE-THRUS

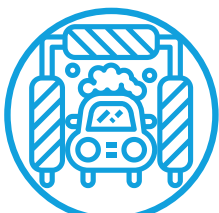

MALLS

SCHOOLS

BANKS

CAR WASHES

TRAFFIC

PARKS

IT'S TIME TO TAKE ACTION

Take action by educating yourself and urging your community to get involved in addressing environmental concerns.
