

# Green Fleets of the Bluegrass

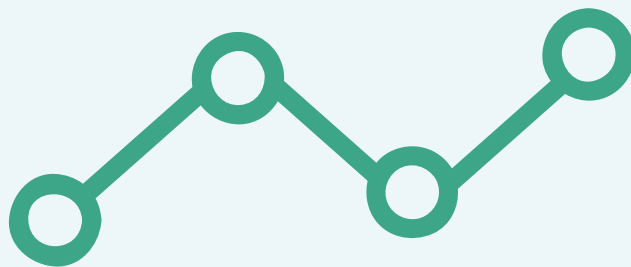

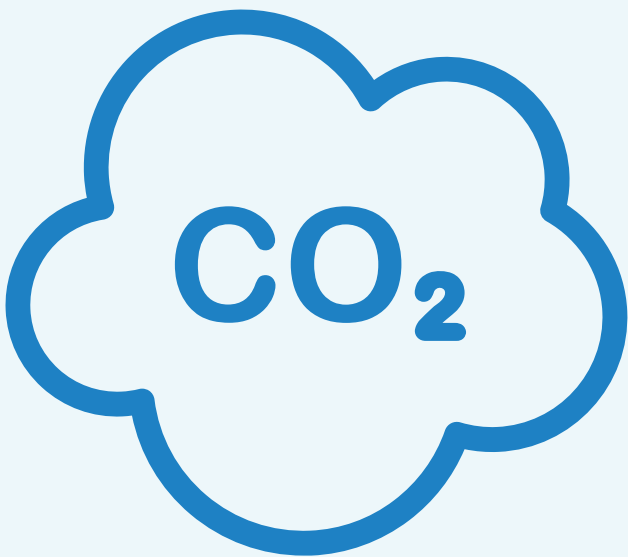

As of 2020, nearly 10,000 alternative fuel vehicles, including EVs, HEVs, PHEVs, and off-road vehicles are a part of the Green Fleet of the Bluegrass program.

Vehicles in the Green Fleets of the Bluegrass program were able to cut petroleum use by over 14 million gallons in 2020. This is 9x higher than what was reduced in 2012.

From 2012 to 2020, vehicles in the Green Fleets of the Bluegrass program reduced GHG emissions by 400,000 tons.

400K

Benefits of participating in the Green Fleets of the Bluegrass program include high-level fleet analysis, certification, and recognition.

Participation on the Green Fleets of the Bluegrass program is free! Visit [KentuckyCleanFuels.org](https://KentuckyCleanFuels.org) to submit your fleet data and get started!
